              – Would like some

3 Style   – unclear variable names
          – code is difficult to read (very little whitespace)
              ↳ diff to navigate.
          ? redundant methods? (not explained why they were chosen)

4 Robustness   + Seems to work, good job
               + has some exception

3 Readme + clear plan
         ? What is a "Stack-queue" ?
         – Vague language "Method Selection Rationale"
         – methods in deque not specified or
              at least easy to reach.
